Our Grasslands
我們的草原

Our planet's grasslands are the rich home to our big land animals, but they're also shrinking. Life in our grasslands depends on space.

Our grasslands are home to many of our largest land animals, but they are also facing threats from habitat loss. Life in our grasslands depends on space.

1. Blue Wildebeest 蓝斑角馬
Aerial view of the blue wildebeest migration. Up to 1.5 million wildebeests move through the Serengeti-Mara ecosystem each year.

2. Cheetah 猎豹
Three male cheetahs hunting wildebeests on the plains of the Masai Mara Game Reserve, Kenya.

3. Pearl-bordered Fritillary 斑纹蝴蝶
A cluster of small, pearl-bordered fritillaries in the butterfly-rich meadows of Hungary.

4. Indian Elephant 印度象
Wild Indian elephants in the mist, Kaziranga National Park, Assam, India.

5. Mongolian Wild Horse 蒙古野马
As late as May, an unseasonably late snowstorm is weathered by a Takhi, or wild Mongolian horse, and its one-year-old foal.
